

This architectural elevation drawing shows a two-story building facade. The upper floor features a series of windows: a small square window on the left, a larger square window in the center, and two sets of three vertical rectangular windows on the right. The lower floor has a central entrance door with a small transom window, flanked by two sets of three vertical rectangular windows. A balcony with a railing is located on the left side of the ground floor, and a staircase with a railing leads up to the entrance. A long horizontal overhang is visible above the entrance area. The drawing is a line art representation with no shading.

This architectural elevation drawing shows a building facade with a flat roof and a series of windows. The facade is divided into two main levels. The upper level features a row of four large, multi-paned windows, each consisting of a top section with two small panes and a larger bottom section divided into three vertical panes. The lower level has a row of four windows: the first two are similar to the ones above, the third is a smaller, single-paned window, and the fourth is a taller, narrow window. To the left of the building, there is a long, low structure with vertical slats, possibly a fence or a covered walkway, and a set of stairs leading up to it. To the right, there is a set of stairs leading up to a small, elevated platform or entrance. The drawing is a line art representation with no shading or color.
